Re: Mail-Order Home Delivery for Prescription Drugs

Beginning July 1, 2003, you will be able to obtain your maintenance prescription drugs from Medco-Health by mail-order and home delivery. Maintenance drugs are drugs that you take over an extended period of time. Usually your physician will prescribe a 90-day supply for these drugs, sometimes with up to 4 refills.

Why should you use Mail-Order Home Delivery?

- It's easy. Once you have submitted your original prescription – which your physician can FAX to Medco-Health for extra convenience – you can refill prescriptions by telephone or over the internet at www.medcohealth.com.
- It's convenient. Prescriptions are delivered directly to your home, usually within 7 to 10 days from the time you place your order.
- It's less expensive. Brand-name prescription drugs are discounted up to 29% off average retail price, while generic drugs are over 50% off retail. If you're one of the many NOREBT plan members who pay 20% of the cost of their prescription drugs after satisfying the deductible, you will save when compared to your costs at a retail pharmacy.

In early June Medco-Health will send you information that tells you how to use mail-order home delivery for your maintenance drugs.
